

Bhargavi Yaparla

B.Tech Computer Science and Engineering (Data Science)

bhargaviyaparlaa@gmail.com- +91 7416076232 — LinkedIn — Github — LeetCode — CodeChef

PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science (Data Science) student with hands-on experience in Python, SQL, Machine Learning, and Data Analytics. Worked on academic projects involving data analysis, predictive modeling, and AI-based applications, along with experience from an AI Engineering internship. Interested in solving real-world problems using data and technology, with a focus on practical and reliable solutions.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering (Data Science)

2023–2027

Rajeev Gandhi Memorial College of Engineering & Technology, Nandyal

CGPA: 8.46

INTERNSHIP EXPERIENCE

AI Engineering Intern — Oscowl AI

Mar 2026 – Aug 2026

- Researched and developed Large Language Models (LLMs) and Small Language Models (SLMs) using Python and PyTorch.
- Implemented transformer architectures, attention mechanisms, model optimization, benchmarking, and performance evaluation.
- Performed model training, inference, debugging, technical documentation, and experimental analysis while collaborating with the AI research team.

PROJECTS

Industrial Energy Consumption Prediction – GitHub

Aug 2025 – Dec 2025

- Developed a machine learning pipeline to predict industrial energy consumption using historical operational data.
- Performed data preprocessing, exploratory data analysis, feature preparation, and model evaluation using Python.
- Compared multiple regression algorithms using appropriate performance metrics and selected the best-performing model for energy forecasting.
- **Tools:** Python, Pandas, NumPy, Scikit-learn, Matplotlib.
- **Outcome:** Built a data-driven forecasting solution to support energy planning and operational decision-making.

AI-Powered Smart Parking System – GitHub

Feb 2026 – Apr 2026

- Developed a smart parking system to detect occupied and vacant parking spaces using real-time images.
- Used YOLO and OpenCV for vehicle detection and parking slot classification.
- Integrated the detection model with Flask to display parking availability through a web interface.
- **Tools:** Python, YOLO, OpenCV, Flask, HTML, CSS.
- **Outcome:** Automated parking monitoring and displayed real-time parking availability.

RESEARCH PUBLICATIONS

The Viola Architecture for Efficient Small Language Models

Jul 2026

- Co-authored a published research paper introducing Viola, an efficient Small Language Model (SLM).
- Contributed to architecture design, experimentation, benchmarking, and technical documentation for the proposed model.
- Technologies: Python, PyTorch, NLP, Deep Learning, Transformers.

Real-Time Crop Disease Avoidance and Weather-Constrained Farm Scheduling Using MobileNetV2

Mar 2026

- Co-authored an AI-powered smart agriculture research paper integrating MobileNetV2 and multilingual voice assistance.
- Developed an image-based disease detection pipeline and integrated weather-aware crop scheduling recommendations.
- Secured **3rd Place** at the Student Research Development Conference (SRDC).

TECHNICAL SKILLS

Programming: Python, SQL

Data Science & Analytics: Pandas, NumPy, Matplotlib, Exploratory Data Analysis

Machine Learning: Scikit-learn, Regression, Classification, Clustering

Deep Learning & AI: CNN, NLP, LLMs(Basic)

Databases: MySQL, Snowflake

Core CS: Data Structures & Algorithms (Basic), Operating Systems(Basic)

Tools: Git, GitHub, VS Code, Databricks

ACHIEVEMENTS

- Published two research papers in Artificial Intelligence and Machine Learning.
- Secured **3rd Place** at the Student Research Development Conference (SRDC).
- AI Engineering Intern at Oscowl AI, contributing to Small Language Model research.

CERTIFICATIONS

- Oracle Cloud Infrastructure AI Foundations Associate
- Oracle Generative AI Professional
